## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, 35, and 52-74, drawn to an electrical control module power nodes, classified in class 361, subclass 685.
- II. Claim 75, drawn to power node control center, classified in class 307, subclass 43.
- III. Claims 27-33, 36-45, 48-51, and 76-79 drawn to power bus backplane, classified in class 361, subclass 752.
- IV. Claims 46-47, drawn to module, classified in class 361, subclass 679.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as electrical module not using the power node control center of II, the power bus backplane of III or the specific module design of IV, invention II has separate utility such as a power node control center not using the electrical module of I, the power bus backplane of III or the specific module design of IV, invention III has separate utility such as the power bus backplane not using the electrical module of I, the power node control center of II, or the specific module design of IV, and invention IV has separate

utility such as a module design not using the of electrical module of I, the power node control center of II, or the power bus backplane of III. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Charles Quinn on 01-09-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh S Phan whose telephone number is 703-305-0069. The examiner can normally be reached on M-F 9:00-5:00.
